

The best choice for economy & performance

FieldLink® AS-Interface cables

BENEFITS

- Flexible
 - Cost-optimised (EPDM)
 - Simple installation
 - Reduction of installation errors
 - High distribution
 - Best networking options
- All BizLink ASi cables are suitable for new ASi-5 standard

OUR EXPERTISE >

We offer a comprehensive selection of AS-Interface cables specifically tailored to meet the requirements of various industrial sectors.

With our many years of experience and expertise in cable manufacturing, we guarantee the highest quality and reliability.

THE CABLE >

The yellow profile cable is the trademark of AS-Interface. Thanks to its profiled design, the cable is protected against polarity reversal and can be connected easily and safely at any point.

THE CONSTRUCTION >

The AS-Interface cable is an unshielded flat cable with 2 cores. It transmits data and power for actuators and sensors. For special applications, black, red or grey cables are also available.
